

# *The Climate Change*

# CRISIS

What Does the Bible Say?

# This Is My Father's World

This is my Father's world,  
 And to my listening ears  
 All nature sings, and round me rings  
 The music of the spheres.  
 This is my Father's world:  
 I rest me in the thought  
 Of rocks and trees, of skies and seas--  
 His hand the wonders wrought.

This is my Father's world:  
 The birds their carols raise,  
 The morning light, the lily white,  
 Declare their Maker's praise.  
 This is my Father's world:  
 He shines in all that's fair;  
 In the rustling grass I hear Him pass,  
 He speaks to me everywhere.

This is my Father's world:  
 O let me ne'er forget  
 That though the wrong seems oft so strong,  
 God is the Ruler yet.  
 This is my Father's world:  
 Why should my heart be sad?  
 The Lord is King: let the heavens ring!  
 God reigns; let earth be glad!

# First It's Polar Ice Caps, Then It's Global Warming

## God's End-Time Scenario

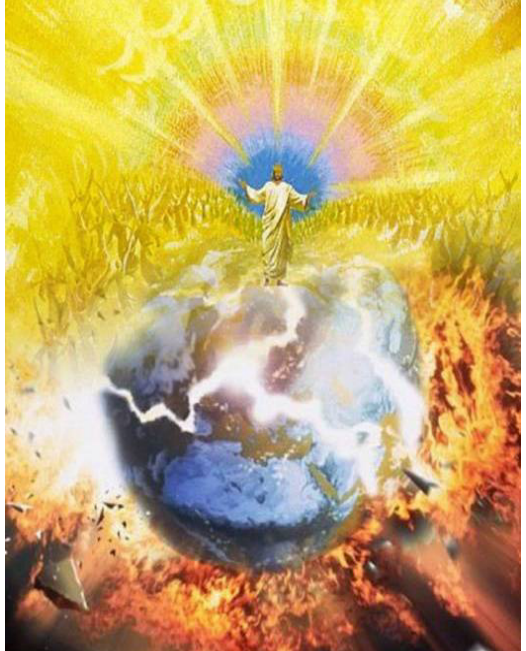

"The earth mourneth and fadeth away, the world languisheth and fadeth away, the haughty people of the earth do languish" Isaiah 24:4.

"The earth also is defiled under the inhabitants thereof; **because they have transgressed the laws, changed the ordinance, broken the everlasting covenant**" Isaiah 24:5.

"Therefore hath the curse devoured the earth" Isaiah 24:6.

"The earth shall reel [wobble] to and fro like a drunkard, and shall be removed like a cottage; and **the transgression thereof** shall be heavy upon it; and it shall fall, and not rise again" Isaiah 24:20.

You want to talk about the earth changing? God says that in the last days the earth is going to "reel to and fro like a drunkard." This means the planet will wobble off its axis and serious weather conditions will be seen. **There is no debate that our earth is changing. The vital questions are,**

**"How much is the change and what are the real causes?"** The Prophet Isaiah tells us why our planet is in complete disarray. He gives the answer above by concluding with the real motive:

"And it shall come to pass in that day, that **the LORD shall punish** the host of the high ones that are on high, and the kings of the earth upon the earth" Isaiah 24:21.

**What is the cause? Isaiah says that it's punishment for transgression and sin.** The Bible says that great changes will be seen in our planet's weather systems during the last days. (See references above and following.) Just before the Lord returns the earth will be in great commotion – and according to Scripture, **these disasters always seem to be tied together with transgression of God's law:**

"By swearing, and lying, and killing, and stealing, and committing adultery, they break out, and blood toucheth blood. Therefore shall the land mourn, and every one that dwelleth therein shall languish, with the beasts of the field, and with the fowls of heaven; yea, the fishes of the sea also

shall be taken away” Hosea 4:2, 3.

“How long shall the land mourn, and the herbs of every field wither, for **the wickedness of them that dwell therein?**” Jeremiah 12:4.

Jesus described this very same scenario when He announced the signs of His appearing:

“For nation shall rise against nation, and kingdom against kingdom: and there shall be famines, and pestilences, and earthquakes, in divers places” Matthew 24:7.

Why will these disasters exist on our earth during the last days? Because cataclysmic events always seem to follow great periods of transgression and iniquity.

“Then shall many be offended, and shall betray one another, and shall hate one another ... because iniquity shall abound, the love of many shall

wax cold” Matthew 24:10, 12.

As sin increases so will destructive weather systems and natural disasters. These final events have been directed by God. **The future is in His hands**, not in the hands of men. **This world of evil will soon end, but this end**

**will actually bring about a new beginning** for God's obedient children.

“The earth also and the works that are therein shall be burned up... Nevertheless we, according to his promise, look for new heavens and a new earth, wherein dwelleth righteousness” 2 Peter 3:10, 13.

When this day finally arrives, **Christ will purify the universe and set everything in perfect order**. The Bible calls this “the blessed hope—the glorious appearing of our great God and Savior, Jesus Christ” (Titus 2:13). Our only assurance of salvation and hope is in God and not in any invention, policy, doctrine, wishful thinking, scheme or fraud devised by man today.

## **A Deception Created by Climate Alarmists**

The National Aeronautic and Space Administration (NASA) has a premier, elite team of top scientists called the “Goddard Institute for Space Studies” (GISS). [1] These NASA scientists are dedicated to analyzing and tracking the earth's temperature index. [2] They are also directly responsible for providing climate change data to the United Nations' own group of climate scientists called the Intergovernmental Panel on Climate

Change (IPCC). [3]

And who is the IPCC? They are the UN scientists who prepared the reports used to produce the Paris Climate Accord (PCA) that was signed by 195 countries in December 2015, including our previous President. This PCA became the first legally binding climate deal designed to save the planet by reducing carbon greenhouse gases. [4] In the actual text of the PCA the IPCC is listed as a contributor to the document. [5]

So NASA scientists from the GISS feed information to scientists at the United Nations (IPCC), and the IPCC in turn writes the reports used to create climate change policies. **So where is the fraud and deception taking place?** It's in NASA's own admission.

The lead NASA scientist and director for GISS is Gavin Schmidt, and **he recently admitted there is a "margin of error" in their data that is so huge they are only 38% sure their climate change information is accurate.** [6] Did you catch this? The leading scientists and physicists whose job is to provide the necessary data so that politicians at the UN can come up with climate change policies have admitted **they are only 38% sure their data is correct.**

In other words, **the experts who are driving the climate movement believe there is a 62% chance that their climate change data is inconclusive or outright incorrect. But somehow they seem to be 100% certain that the world is going to end tomorrow because of CO2 (carbon) greenhouse gasses. Everyone is going to die unless we lower CO2 emissions, pay some kind of new carbon tax and, as Rome would have us do – implement a green Sunday law.**

If these experts are only 38% sure that their figures are right, even with all the supercomputers and satellites, space station and government funding – then how can they accurately predict global temperature models for the next 50 to 100 years? **They can't! It's a big con job** because anytime climate scientists release their doom and gloom study, **if their margin of error is 62% or anywhere near that figure, it means their climate change hypothesis is already dead. The typical acceptable margin of error for any research or polling study is around 5%.** [7] 62% is a whole lot more than 5%!

**Dr. Hoesung Lee is speaking at the Paris Climate Agreement Conference in 2015. He is head of the UN's Panel on Climate Change (IPCC). This was the agency responsible for helping to prepare the Paris Climate Agreement (PCA) document.**

## Suppressing Historical Events and Facts

Why do all the climate change activists start tracking the earth's warming cycle during the 1880 years? In their charts, in their reports, in the school textbooks, in their speeches and in their climate model projection videos why do NASA scientists use the 1800s as the starting point to showcase the rise in global temperatures? **The reason for starting in the 1880s is purely political.**

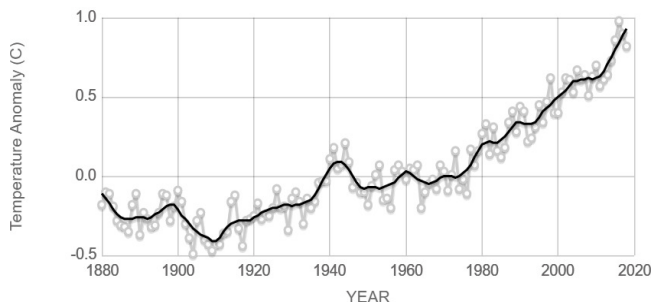

**They do this to suppress certain truths and events that existed prior to the 1880s – facts that will debunk the current, popular climate change projections.** Most of us have never heard about the “Little Ice Age” or the “Medieval Warm Period.” **That is because these historical events contradict the climate change hype being pushed by environmental activists.**

The Little Ice Age was a period between the 1300s and the 1870s that was much colder than previous and successive centuries. [8] Throughout Europe, North America and over much of the Northern Hemisphere most rivers and lakes froze, winter seasons were prolonged by several weeks,

crops failed, famine ensued and populations declined. [9]

Prior to the Little Ice Age there was another time period between 950 and 1250 which is called the Medieval Warm Period or Anomaly. [11] This was a time when various parts of the world experienced high temperature levels similar to what we are experiencing now—see chart.

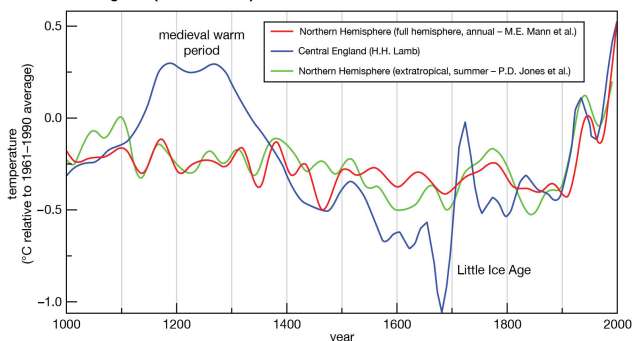

However, Chinese scientists have argued that high temperatures felt during the Medieval Warm Anomaly (950 to 1250) were higher than the weather temperatures of today! This study is supported by the Chinese Academy of Sci-

## NASA's Temperature Tracker starts in the 1880s. [10]

Estimated temperature variations for the Northern Hemisphere and central England (1000–2000 ce)

Sources: M.E. Mann et al., "Northern Hemisphere Temperatures During the Past Millennium: Inferences, Uncertainties, and Limitations," *Geophysical Research Letters*, 26:759–762 (1999); P.D. Jones et al., "High-resolution Palaeoclimatic Records for the Last Millennium: Interpretation, Integration, and Comparison with General Circulation Model Control Run Temperatures," *Holocene*, 8:477–483 (1998); H.H. Lamb, "The Early Medieval Warm Epoch and its Sequel," *Palaeogeography, Palaeoclimatology, Palaeoecology*, 1:13–37 (1965).

**In this chart Encyclopedia Britannica shows both the Medieval Warm Period and the Little Ice Age temperature levels. Notice the blue line. [12]**

ence. The data states: “Tree ring, lake sediment and literature records from eastern and northwest China imply that temperatures in recent decades do not seem to exceed the natural changes in MCA (Medieval Climate Anomaly).” [13]

In other words, the growing heat index since the 1880s is not unique to our time. Weather cycles of hot and cold periods have always existed. **What the so-called climate experts won't tell is that we were just coming out of the Little Ice Age in the 1880s.** And just before the Little Ice Age we were going through a period of hot weather called the Medieval Warm Period – which, according to top scientists in China, was a much hotter period than what we are now experiencing.

### **Alternative Causes for Rise in CO2 are Ignored**

“Therefore shall the land mourn, and every one that dwelleth therein shall languish, with the beasts of the field, and with the fowls of heaven; yea, the fishes of the sea also shall be taken away” Hosea 4:3.

These natural tragedies are far from over; they are just developing. **This is only the beginning of sorrows because far more terrible calamities are coming.** What we are seeing now is small in comparison to what is about to break upon our world. Natural disasters are coming with much greater frequency and intensity and **every indication is that we are entering a period of great instability.**

Just one volcanic eruption can put out as much carbon (CO2) into the air as humans can in a lifetime. [14] And there are thousands of volcanoes both on earth and underwater. They are constantly emitting CO2 gases into the atmosphere, and this happens even without major eruptions. **As we draw nearer to the end, volcanic activity will increase which will cause even higher levels of CO2 in our atmosphere.**

Just one fire storm alone has the ability to undo a year's worth of carbon reduction efforts. This actually happened. [15] In California, one fire erased all of the gains made in greenhouse gas reduction from the previous year. The closer we get to the coming of the Lord, more and more raging infernos will be seen on earth. So all the efforts, sacrifices, regulations and billions spent to reduce CO2 greenhouse gas emissions come to NOTHING as frequent and more intense natural disasters occur.

**The truth is that our world isn't going anywhere because God has it all under control. He is keeping the world intact until a certain day:**

“For this they willingly are ignorant of, that by the word of God the heavens were of old, and the earth standing out of the water and in the water...But the heavens and the earth, which are now, by the same word **are kept in store, reserved unto fire against the day of judgment and perdition of ungodly men**” 2 Peter 3:5, 7.

Just as men are ignorant today that “By the word of the Lord were the heavens made...He spake and it stood firm” Psalm 33:6, 9 – our world is also completely ignorant of the fact that it is by God’s Word alone that our planet is being reserved for the day of judgment. **This earth isn’t going anywhere just yet because it’s all in His hands just as He promised:**

**“While the earth remaineth, seedtime and harvest, and cold and heat, and summer and winter, and day and night shall not cease”**  
Genesis 8:22.

**“It is of the LORD’S mercies that we are not consumed, because his compassions fail not. They are new every morning: great is thy faithfulness”** Lamentations 3:22, 23.

**It is only because we have a loving, compassionate God that our world has not self-destructed.** The devil can not obliterate our planet; if he could he would have done it a long time ago. Man has enough nuclear bombs to destroy all life on earth, but God is keeping things under control because He still has a work for His obedient people to do. God has already declared:

**“Hurt not the earth, neither the sea, nor the trees, till we have sealed the servants of our God in their foreheads”** Revelation 7:3.

**All the destructive forces of the universe are being held in check until the gospel can do its final work. Once this work is completed, once the servants of God are sealed on their foreheads and once the 7 last plagues of Revelation 16 begin to fall .... may the Lord have mercy upon those who have the mark of the beast or who worship his image! Our world will ultimately come to the condition which the ancient prophets accurately foretold would come:**

“I beheld, and, lo, the fruitful place was a wilderness, and all the cities thereof were broken down at the presence of the Lord, and by his fierce anger. For thus hath the Lord said, **The whole land shall be desolate; yet will I not make a full end**” Jeremiah 4:25, 27.

The good news is: out of the ashes of the old world, God will establish His kingdom that will never pass away! This is an exciting prospect to look forward to.

# The Climate Change Movement is the Greatest Example of Mass Hysteria in Human History

Yes, today we hear the impending horrors of global warming and the end of the world due to climate change. **Back in 1978 dark predictions were made about the end of earth's civilization over global cooling and of a coming Ice Age within our "lifetime."**

There is a video you can see online [16] that the current climate change movement does not want you to see. It is a TV special called "In Search Of" that was televised in 1978. This documentary was a dire warning by leading scientists, climatologists and weather experts who were sounding an alarm about global cooling and a coming Ice Age. **It was presented as**

**"scientific fact"** and based on a 30-year study of the earth's cooling trend.

This televised climate program featured Leonard Nimoy (narrator), the US Army, the National Science Foundation, the State University of New York, Columbia University and world

**During the Climate Strike in New Zealand students call for action from local and national government on climate change. Photo Credit: Tom Lee/Stuff**

leading climate scientists who all claimed in 1978 that the earth was on the brink of a global cooling disaster.

But it wasn't just the above video that was predicting with certainty that our world would enter an Ice Age within our lifetime. Following are 116 additional news media sources, documentaries, scholarly articles, books and publications that were supporting the coming global cooling disaster. Who were these corroborating sources that were affirming the global Ice Age hysteria?

The list of 116 sources include the following: National Oceanic and Atmospheric Administration (NOAA – the leading climate experts), *New York Times*, *LA Times*, *The Boston Globe*, *The Sydney Morning Herald*, *Chicago Tribune*, *The Washington Post*, *The Sun*, *Time Magazine*, *Popular Science*, *Forbes Magazine*, *Newsweek*, *The Spokesman-Review* and *The Telegraph*, just to name a few.

**These are the same scientists and news media outlets that are now advocating the modern global warning hysteria; 40 years ago**

they were advocating an ice age within our lifetime – and their predictions were all based on “science.” Today, these very same people have changed their message and “science.” Now we are facing a

global warming apocalypse.

These 116 news stories and headlines are not isolated. It was a world-wide, global hysteria by leading scientists, climatologists, weather experts, historians, news media outlets and authors warn-

**Greta Thunberg, far right, addresses the Climate Action Summit at the UN’s General Assembly on Sept. 23, 2019.**

ing of an imminent Ice Age which would engulf the entire planet. Remember, this list is not comprehensive since not all the media publications from the 1970s are available in digital format.

Read the 116 sources and the headlines below and watch the video previously mentioned. See how the “experts” were trying to force their climate hysteria on the world back then. **Nothing has changed** – they are doing it again.

1979 – Get Ready to Freeze (Daily Chronicle, October 12, 1979)

1979 – New ice age almost upon us? (The Christian Science Monitor, November 14, 1979)

These headlines with their links are published by Popular Technology.net [17]

## Students Unaware of “Scientific” Ice-Age Predictions

Students today who are engaged in this world-wide climate strike have no clue that the “experts” are making an abrupt reversal on climate policies and predictions. How does the climate change movement flip-flop on “science” in just 40 years – from the world being destroyed by an Ice Age

to being destroyed by global warming?

Now we are being told by climate activist, Greta Thunberg, to “listen to the scientists” and “unite behind the science.” [18] **Which scientists are we going to listen to?** The scientists who were predicting the mass hysteria of a coming Ice Age that would freeze the world? Or do we believe the same scientists (from the same organizations) who are now predicting the mass hysteria of a global warming apocalypse?

I repeat: Do we believe what they said 40 years ago or do we wait to see what their science will tell them in 40 years from now? “For the wisdom of this world is foolishness with God” 1 Corinthians 3:19.

Students in Tasmania protest during a rally.

**How about listening to scientists who reject the hysteria and tell us the earth goes through natural periods of warming and cooling? How about listening to scientists who tell us that man has little or no impact on climate change? How about listening to the experts who tell us the current climate change debate is a political agenda based on the desire to eliminate freedom and impose tyranny; and based on the desire to control?**

These experienced scientists who disagree with the climate change hysteria get little or no publicity in the press, hardly any funding, and are not politically correct. [19] [20]

We have to recognize that there are two worldviews when it comes to interpreting science. Sadly, it is the secular, humanist worldview that has more to do with the conclusions we hear in the mainstream media – that global warming is man-made, and drastic actions must be taken immediately to avoid global disaster.

**This is the same left-wing, politically motivated science that tells us that a baby in the mother’s womb is just tissue. It’s the same propaganda-based science that says that there are over 100 different types of gender and that some are born with a gay gene.**

On the other side you have those who believe in the biblical view of marriage (Genesis 2:21-24); who believe in the biblical view on sexual identity (Matthew 19:4); who accept the biblical view about gender roles and gender identity (1 Corinthians 11:3; Ephesians 5:23); who embrace the biblical view on creation and science (Genesis 1:1) and who accept the biblical view of the end of the world (2 Peter 3:10).

As said before, there is a biblical view on climate change. God says that in the last days the earth is going to experience serious weather conditions and natural disasters. This climate phenomenon will increase and become more intense as we get closer to the Second Coming of Jesus. Our earth's climate is changing. The only question is, "What is the real cause for all the planetary changes?" God says that it is not due to carbon (CO<sub>2</sub>); it's because the world is coming into the period described in the Bible as the "last days of earth's history."

**God is concerned about heart-change.  
He has climate change all under control.**

Here is the FINAL prediction about climate change found in Revelation 16:8-11. This is the one we need to be concerned about and make sure we are not on the side of the beast:

***"And the fourth angel poured out his vial upon the sun; and power was given unto him to scorch men with fire.***

***"And men were scorched with great heat, and blasphemed the name of God, which hath power over these plagues: and they repented not to give him glory.***

***"And the fifth angel poured out his vial upon the seat of the beast; and his kingdom was full of darkness; and they gnawed their tongues for pain,***

***"And blasphemed the God of heaven because of their pains and their sores, and repented not of their deeds."***

# Catholics and Protestants Dressed in Black Attend a Funeral Service for a Dead Glacier

Catholics, Protestants and climate change activists, dressed in black, held an interfaith funeral service on Sunday, September 22, 2019 for the Pizol Glacier in the Alps of Northeastern Switzerland. The service for the dead glacier began with a 2-hour “funeral march” to the top of the summit where the mighty glacier once stood. [1]

There is even a video of this funeral service where you can see mourners express their grief with the words: “We have built a relation with this glacier over time ... many people say goodbye to this glacier as we do with humans whom we have loved.” [2]

Hundreds of people came to pay their respects to the “victim” glacier who is being called a casualty of global warming. Participants cried during the memorial service for the “beloved” Pizol Glacier. This funeral service took place one day before the United Nations’ Climate Summit in New York which began on Monday, September 23, 2019.

The memorial service was co-sponsored by Fastenopfer (Catholic Relief Agency), Bread for All (Development Service of the Protestant Churches in Switzerland), the Association of Church and Environment (a forum of 600 churches), Greenpeace and other environmental groups. [2]

Eric Petrin, a Roman Catholic priest from the Diocese of St. Gallen, Switzerland, presided over the “tragic” funeral for the melted ice. [3] We wonder if Catholics and

Protestants will soon start having religious services to honor the trees, mountains, oceans and planets?

This pantheistic, idolatrous service is honoring everything other than the God of heaven. The Bible calls this “worship of creation above the Creator” (Romans 1:25). And instead of having a funeral service for the Pizol Glacier, they should have held a funeral service for the “TRUTH.”

The truth died many years ago in these churches. Truth in secularized Europe has been euthanized and aborted by liberalism. This funeral service for nature has more to do with earth worship than with Christianity. All this affection for the environment is a revival of pantheism, while making a mockery of a religious funeral service.

However, to show that we can be sympathetic whenever tragedies occur, we offer the following eulogy to all those in Switzerland and throughout the world who may be mourning the death of the Pizol Glacier.

## A Eulogy for Pizol the Glacier

*Pizol was once a mighty glacier who was born thousands of years ago as a tiny ice cube. As the years passed he grew into a popsicle. But not being content, his heart became cold and he grew into a massive block of ice slowly killing his brothers and sisters called grass, trees and flowers.*

*Later, Pizol became even more cold until his heart became so frigid that his immense growth and weight began crushing the beautiful valleys where the deer, rabbits and other poor, helpless animals lived.*

*Pizol finally became the most glorious of glaciers but he didn't give respect to the gods of nature called earth, wind and fire. Instead, Pizol crushed “mother earth” and brought freezing temperatures with his massive weight and size.*

*So his father, the sun, came out to punish Pizol for being so destructive due to his icy cold heart. The sun came out to battle Pizol with heat, pushing back his chilling cold. Pizol fought valiantly against the sun; but alas, he melted away*

exasperated and defeated. In his dying day Pizol was reduced to a snow cone because he didn't show love for his brothers and sisters or to the gods of nature.

Pizol, may your glacier soul rest, not in "peace" but in pieces of diminishing ice. Your death means more useable land for everyone – land which you stole during the years of your expansion.

Pizol, our brother, you should have been born in America. Had you been born in America you would still be alive. Apparently, Montana is a much better place for glaciers than Switzerland.

In fact, our US Government has had to remove their embarrassing signs and brochures at Glacier National Park in Montana which were predicting that all its glaciers would be gone by the year 2020. And it turns out that our glaciers here are not decreasing but expanding. [4]

So Pizol, your death was not caused by man, CO2 or global warming as the environmentalists in Switzerland are saying. Your timely death came because of natural weather patterns of hot and cold which have been going on for 4,000 years. Nothing has changed!

FREE BOOK OFFER—Will two former rivals unite? A stupendous crisis awaits us. **The Great Controversy** book is an international best seller that portrays a compelling account of unseen powers struggling for supremacy. Revealing God's ultimate plan for mankind, this masterful volume is a thrilling presentation of the past, the present and the future. Our world has become a very frightening place indeed! This book takes you behind the scenes and identifies the key players in the end-time quest for world dominance. Free Book Offer. No Shipping or Handling Costs. Order contact information on next page.

# *Laudato Si'* - Taking the Climate Change Crisis to the Next Level

Pope Francis is committed to environmentalism and climate change. He has published an encyclical called *Laudato Si'* that is a warning about natural disasters due to so-called changes in the climate. Greta Thunberg is part of the “*Laudato Si'* Generation,” which is a movement to raise awareness to dangerous CO<sub>2</sub> emissions which “experts” claim is a leading human cause influencing climate changes.

In these pictures Thunberg is clearly an important ally for promoting the Pope’s green Sunday law which he considers to be a solution to the so-called climate change crisis.

According to the actual text, *Laudato Si'* has a **Sunday rest provision** (section 237) and an “enforcement of law” provision (section 179). [2]

The Pope’s climate encyclical is for a definite purpose: to unite the secular and religious world. **According to Catholic experts *Laudato Si'* is “legislation”**

**they are predicting will become “law” within 10 years or less.** [3] It certainly was not written only as a conversational piece for pastors, churches and the secular world. How else could the Pope get the secular world to support a Sunday law?

In addition to promoting his environmental policies to different religious and civil organizations, a new global campaign is being initiated on the 5th anniversary of the climate change encyclical. Pope Francis

Here Greta Thunberg joins Pope Francis in Rome, Italy in leading Student Climate Strike around the world. [1]

Greta Thunberg’s sign says “Celebrate *Laudato Si'*.” [1] She may not even be aware of the real purpose of the Pope’s encyclical.

is renewing the call to take action on what he calls the “ecological crisis” by instituting an annual, week-long celebration called the “**2020 *Laudato Si’ Week***,” scheduled to take place May 16-24, 2020.

The Vatican has published a video message of the Pontiff in which he urges the world to celebrate his encyclical on ecology on its 5th anniversary. In the video Pope Francis invites people to participate in “*Laudato Si’ Week*.” [4] A new website was also created to promote and highlight this new annual, week-long “*Laudato Si’ Week*” celebration. Notice how a “radical commitment to our Creator” is described in this new effort:

“We’ve come a long way toward protecting our common home, but the journey ahead demands radical commitment to our Creator and each other. We’re coming together for **the next step** in our groundbreaking journey of hope.” [5]

A “groundbreaking journey” and a “radical commitment to our Creator?” It is not in a positive way! In a news release published by the Vatican, the Pope renews his urgent call to respond to the crisis:

“The cry of the earth and the cry of the poor cannot continue,” he says. “Let’s take care of creation, a gift of our good Creator God. Let’s celebrate ‘*Laudato Si’ Week*’ together.” [6]

### **Over 900+ Catholic Organizations World-wide are Working to Implement the Pope’s Green Sunday Law**

The Catholic Climate Movement is a global network of over 900+ Catholic organizations, including the Jesuits, the Knights of Columbus and many more. [7] They have **organized for one purpose** – to implement Pope Francis’ *Laudato Si’* encyclical which calls, through **stealth**, for “**Sunday**” to be the “**law of weekly rest**” in order to **save the environment**.

The Catholic Climate Movement is using its vast network and membership to lobby political leaders by urging them to adopt *Laudato Si’*. They are also busy training Catholic laypeople to become “*Laudato Si’* Animators.” [8] These “*Laudato Si’* Animators” receive special training

to become “champions” for raising awareness to the Pope’s message on climate change in our society.

In addition to holding seminars, rallies, marches and other *Laudato Si’* events, the Catholic Climate Movement is using its influence to boycott businesses and organizations who are not following the Pope’s message on climate change. [9]

These are the forces that will not stop working until there are more strict protections in place for the environment—which will include calls for Sunday laws. Many claim that by enforcing Sunday closing laws this will somehow save our planet. [10] This is part of the Pope’s agenda to protect and take care of God’s creation.

However, Sunday laws to this point limit the privileges and opportunities of both religious and non-religious minority groups who don’t consider Sunday as a special or sacred day. Sunday laws favor and benefit the larger Christian populations who do consider Sunday as sacred and in need of protection.

**Sunday laws were originally founded and instituted to force people to go to church on Sunday. Emperor Constantine, who wrote the first Sunday law in A.D. 321, made Sunday the official day of rest for the Roman Empire. This law caused church attendance to explode and was meant to benefit the Christian church.**

With all the push for saving the planet, Sunday laws will be agitated throughout the world and will soon come under the national spotlight here in America. Historically, these kinds of religious laws have caused significant distress to millions of people throughout the generations. This is not the way to honor the Creator or His creation. We honor our Creator by keeping holy His memorial to creation – the seventh-day Sabbath. *Laudato Si’* has replaced God’s true memorial of creation.

Sins against God are being substituted with sins against the ecology. Confession and repentance to the Creator is being replaced with repentance to “Mother Earth.” Saving souls is being replaced with saving the planet. And converting to Christ is being replaced with a conversion to a new sense of ecological awareness.

It is one thing to, “Fear God, and give glory to Him; for the hour of His judgment is come: and worship Him that made heaven, and earth, and the sea, and the fountains of waters” Revelation 14:7; and it is a completely different thing when we worship the earth, or join those who push for “climate justice” and other secular, humanistic environmental laws, while we ignore God’s judgment-hour message. It is one thing to remember the Creator and to commemorate His creation by keeping and encouraging others to keep the 7th day Sabbath – but it is a whole different story to embark upon Rome’s unholy environmental revolution [*Laudato Si*] that is sweeping our world and which will soon force **all**, secular and religious, to worship on the day of the sun.
